Farm Safety & Equipment Operation

Students ages 12 to 16 will learn how to operate a tractor over 20 PTO horsepower, including how to connect and disconnect equipment and equipment parts. All classes will have an in-person orientation in April that both students and parents are required to attend. In this orientation, we will discuss the format and expectations for the class. Information will be sent out to you after your registration is completed. The classes contain a virtual training module that must be completed prior to the in-person portion of the class. This portion will run during the month of May. Students who do not complete the online learning module will **NOT** be allowed to attend the in-person class.

For more information or to register please visit <https://classes.fvtc.edu/>
